Professional Summary

Artificial Intelligence & Machine Learning undergraduate passionate about building intelligent, scalable, and user-centric software solutions. Experienced in full-stack web development, AI-powered applications, data visualization, and machine learning with hands-on expertise in React, TypeScript, Python, Flask, Firebase, and modern web technologies. Proven leadership experience as Deputy Chief Student Coordinator with strong problem-solving and collaborative skills.

Education

Bachelor of Technology (Artificial Intelligence & Machine Learning)

D. Y. Patil College of Engineering & Technology, Kolhapur

2023 – 2027

HSC

Chhatrapati Shahu Vidyalaya & Junior College, Kolhapur

2021 – 2023

SSC

Chhatrapati Shahu Vidyalaya, Kolhapur

2020 – 2021

Skills

- | | |
|-------------------------------------|--|
| • Languages & Frameworks | Python, TypeScript, React.js, Node.js, Flask |
| • Web Technologies | HTML5, CSS3, Tailwind CSS, Vite, REST APIs |
| • Database | Firebase, Firestore, MySQL |
| • Tools & Platforms | Git, GitHub, VS Code, Microsoft Excel, Unity, Blender, Vercel, Postman, Figma |
| • Soft Skills | Problem Solving, Team Leadership, Communication, Time Management, Critical Thinking, Adaptability, Collaboration, Quick Learning |

Featured Projects

PocketPilot AI

React • TypeScript • Firebase • Tailwind CSS

- Developed an AI-powered personal finance tracker with budgeting, savings goals, and expense analytics.
- Designed interactive dashboards with charts for financial insights.
- Implemented authentication and cloud-based data storage using Firebase.

StockVision AI

React • Tailwind CSS • Finance APIs

- Built an AI-powered stock market dashboard with live market visualization.
- Added technical indicators and interactive stock charts.
- Integrated AI-generated explanations for market trends.

Ram Mandir in the Metaverse

Unity • C# • Blender • Meta Quest

- Created a virtual reality experience of the Ram Mandir featuring immersive exploration and interactive environments.
- Optimized 3D assets and VR performance to ensure smooth rendering and realistic user interaction.
- Built using Unity, C#, Blender, and Meta Quest with a focus on immersive visualization and real-time rendering.

Leadership Experience

Deputy Chief Student Coordinator

Training & Placement Cell

- Coordinated placement drives and student engagement activities.
- Managed communication between students, faculty, and recruiters.
- Organized workshops and technical events.
- Led a team of student coordinators for smooth execution of placement activities.
